GT-6011-2-2 邊壓試驗夾具 Metal Guide Blocks (Ect) TAPPI T811

適用於瓦楞紙邊壓強度測試。用於固定試樣，使試樣可垂直 (90度)置於環壓試驗機之壓盤上。

This method describes procedures for determining the edgewise compressive strength (ECT), perpendicular to the axis of the flutes, of a short column of single-, double-, or triple-wall corrugated fiberboard. The fixture to be used with the waxed edge specimens. Two metal guide blocks are required to align the specimen vertically in the testing machine.

體積 (約) Dimension	76x44x23 mm
重量 (約) Weight	1 kg (approx.)
