### GT-7017-ELU 老化試驗機 Aging Oven

GB/T3512-2014 1型、ISO 188:2011 1型

適用於測試塑料類、橡膠類、皮類、布類材料受熱前與受熱後變化特性。經規定溫度及時間均勻受熱後，觀測試樣老化前後之耐黃、開膠、收縮、伸長、殘餘率等性能，從而判定其老化特性。

The GT-7017-ELU is designed to determine the characteristics of materials such as plastics, rubber, leather, and fabrics after aging. This aging oven helps operators to evaluate the effects of aging on samples, including discoloration, splitting, shrinkage, and extension after exposure to specified temperature for a prescribed period of time.

|                                    |                                                        |
|------------------------------------|--------------------------------------------------------|
| 溫度範圍 Temp. range                   | 常溫 Ambient temp.+10°C ~ 300°C                          |
| 溫度精度 Temp. resolution              | 0.1°C                                                  |
| 溫度偏差 Temp. accuracy                | ≤100°C: ±1°C<br>101 ~ 200°C: ±2°C<br>201 ~ 300°C: ±3°C |
| 旋轉轉速 Turntable speed               | 5 rpm ~ 10rpm                                          |
| 換氣次數範圍 Air change rate             | 3次/小時 ~ 10次/小時 3 to 10 times/hr                        |
| 試驗箱體風速範圍 Oven air speed            | 0.5m/s ~ 1.5m/s                                        |
| 視窗尺寸 Viewing window dimensions     | 155×185mm ( D×H )                                      |
| 測試時間範圍 Test time                   | 0 ~ 9999H59min 【任意設定 adjustable】                       |
| 內箱尺寸 Interior dimensions ( W×D×H ) | 50cm×50cm×60cm                                         |
| 外箱尺寸 Exterior dimensions ( W×D×H ) | 90cm×82cm×165cm                                        |
| 電源 Power                           | 1φ AC 220V 50Hz/60Hz ( 依國別或指定 or specify )             |
| 功率 Output                          | 3.5KW                                                  |
